

Welcome to **Echoes of Emptiness**, an augmented reality experience for the Heriscope project

**Echoes of Emptiness* transforms abandoned spaces into interactive, hybrid environments using augmented reality (AR) sculptures. By placing posters with QR codes at selected sites, visitors can unlock and interact with digital objects, reimagining these forgotten spaces as dynamic centers for community engagement and speculative futures. This web-based AR experience fosters creative exploration, dialogue, and social transformation, turning neglected urban areas into platforms for collective imagination and cultural revitalization.*

The AR objects

The Pink Gemstone
